**Documents for Discussion****Discussed the following documents:**

- URINALYSIS, DIPSTICK -

Results:

- Leukocytes: Negative
- Nitrite: negative
- Urobilinogen: .2
- Protein: 30
- pH: 6.0
- Blood: Negative
- Specific Gravity: 1.030
- Ketone: Negative
- Bilirubin: Negative
- Glucose: Negative

- US, BLADDER - 12/09/16

Result:

- BLADDER SCAN: 171mL

**Screening**

None recorded.

**HPI****Urgency & Frequency**

Reported by patient.

Quality: improving

Severity: moderate

Duration: intermittent; every 3 hrs

Onset/Timing: date: (10 months ago)

Context: urge incontinence (1x/week)

Alleviating Factors: alpha blockers (have not helped); anticholinergics (detrol)

Aggravating Factors: none mentioned

Associated Symptoms: no chills; no dysuria; complete emptying; no hematuria; no nocturia; no straining stream; no temperature; no urge incontinence; urgency

Notes: NO DIAPERS He tried 4 mg tiazosin without improvement PSA=2.1, cytology neg 4/27/15; Cysto: neg 4-29-15 renal US no mass, stone or hydro 10/15/15: He has been taking derol 2 mg BID. He has seen some improvement with his symptoms. He still has strong urge to urinate and has to get right to the bathroom. He no longer leaks urine and is able to go longer between having to urinate. He denies any dysuria, hematuria, fever or chills. He is not up at night to urinate. He feels he empties his bladder well.

4/15/16: He has been taking trospium. He has not had any accidents. He still can have a strong urge but is able to get to the bathroom in time. He is not up at night to urinate. He has to urinate every 3-4 hrs during the day.

[REDACTED] is urinating well with trospium, no leakage

**ROS**

Patient reports no hives; ALL: alcohol. He reports no fever. He reports no hematuria. He reports no history of diabetes.

**Physical Exam**

Patient is an [REDACTED] old male.

**Constitutional:** General Appearance: healthy-appearing and well-nourished. Level of Distress: no acute distress.

Lungs: Auscultation: No labored breathing and use of accessory muscles.

Musculoskeletal System: Posture head position normal. Gait Normal gait.

Eyes: Sclera normal.

#### Assessment / Plan

##### 1. Increased frequency of urination

R35.0: Frequency of micturition

##### 2. Urge incontinence of urine - to continue trospium

N39.41: Urge incontinence

<b>Physical Exam</b>	<p>Patient is an [REDACTED]-old male.</p> <p><b>Constitutional:</b> General Appearance: healthy-appearing and well-nourished. Level of Distress: no acute distress.</p> <p><b>Lungs:</b> Auscultation: No labored breathing and use of accessory muscles.</p> <p><b>Musculoskeletal System:</b> Posture head position normal. Gait Normal gait.</p> <p><b>Eyes:</b> Sclera normal.</p>
<b>Assessment and Plan</b>	<p><b>1. Urge incontinence of urine</b> - He is not sure if he sees a difference with the medication. Did discuss that he has not leaked any urine and is not up at night. He would like to try coming off the medication to see if he has a change in his symptoms. If he finds it did help he will continue to take it. N39.41: Urge incontinence</p> <p><b>2. Increased frequency of urination</b> R35.0: Frequency of micturition           <ul style="list-style-type: none"> <li>• URINALYSIS, DIPSTICK</li> <li>• BLADDER SCAN</li> </ul> </p> <p><b>Return to Office</b></p> <ul style="list-style-type: none"> <li>• to see Faith-Anne Starr, PA at TAUNTON UROLOGIC on or around 10/15/2016</li> <li>• Faith-Anne Starr, PA for OFFICE VISIT (15 MIN) at TAUNTON UROLOGIC on 11/18/2016 at 04:00 PM</li> </ul>
